

Amanda Adams, P.E. PMP

Senior Project Manager at Stantec

Amanda Adams, P.E, PMP, is a Senior Project Manager at Stantec with 14 years of industry experience. She has a BS in Geological Engineering from Colorado School of Mines. At Stantec she has been involved in a variety of projects, primarily focusing on design of tailings storage dams for mining clients. Design experience has spanned all phases of project development from siting studies to pre-feasibility, feasibility, basic engineering, detailed design, construction, operation and closure. As a project manager she has specialized in the integration of large, diverse project teams, spanning multiple locations both in the US and internationally. She brings together the various technical disciplines required for dam design and coordinates the technical interactions, as well as scope, schedule and budget. Her current projects are located in Colorado, Peru and Chile.

Amanda is involved in a number of professional organizations to promote mining and tailings practices. She is a former President of the Women in Mining Denver Chapter and is currently the chapter Secretary and Alternate National Rep. She is also the Annual National Meeting Planning Committee Chair for the 2020 Annual meeting in Salt Lake City in May titled Changing the Face of Mining; Influencing Public Perception to Attract a Diverse Workforce. Amanda is also the USSD Tailing Dam Committee Chair and is currently planning a workshop for the April USSD Annual Meeting in Denver titled Tailings Dam Safety Management and Engineer of Record. Amanda is also a Co-Chair for the SME Tailing Symposium session about Tailings State of Practice which will be held at SME in Arizona in February.
