

Dale Blyth

Product Manager for Electric Rope Shovels and Draglines
Caterpillar, Inc.

Dale is the product manager for Electric Rope Shovels and Draglines for Caterpillar Inc, based in Tucson, Arizona. Previously, Dale was the Global Operations Manager for the MineStar mining technology suite in Perth, Australia from 2013, and prior to that a regional Product Support Manager for Global Mining in Edmonton, Canada. Dale became part of team Caterpillar through the 2011 Bucyrus Acquisition. His experience has focused on asset management, MARC's, service operations, economic modelling and the adoption of technology to deliver the lowest possible cost per tonne since entering the mining industry in the mid 90's.

Dale began his professional career in the technical trades and created a firm understanding of customers operations from a decade of being based on mine sites maintaining mobile equipment. He moved through a succession of challenging operational and technical roles internationally with increasing responsibility having the opportunity to gain experience with mine operators and mining contractors. He holds a trade certificate in Diesel and Heavy Earthmoving, an MBA from Athabasca University in Canada and a Doctor of Business Leadership from Torrens University in Australia.
